Mr Harold Weisberg
Hyattstown Md. 20734

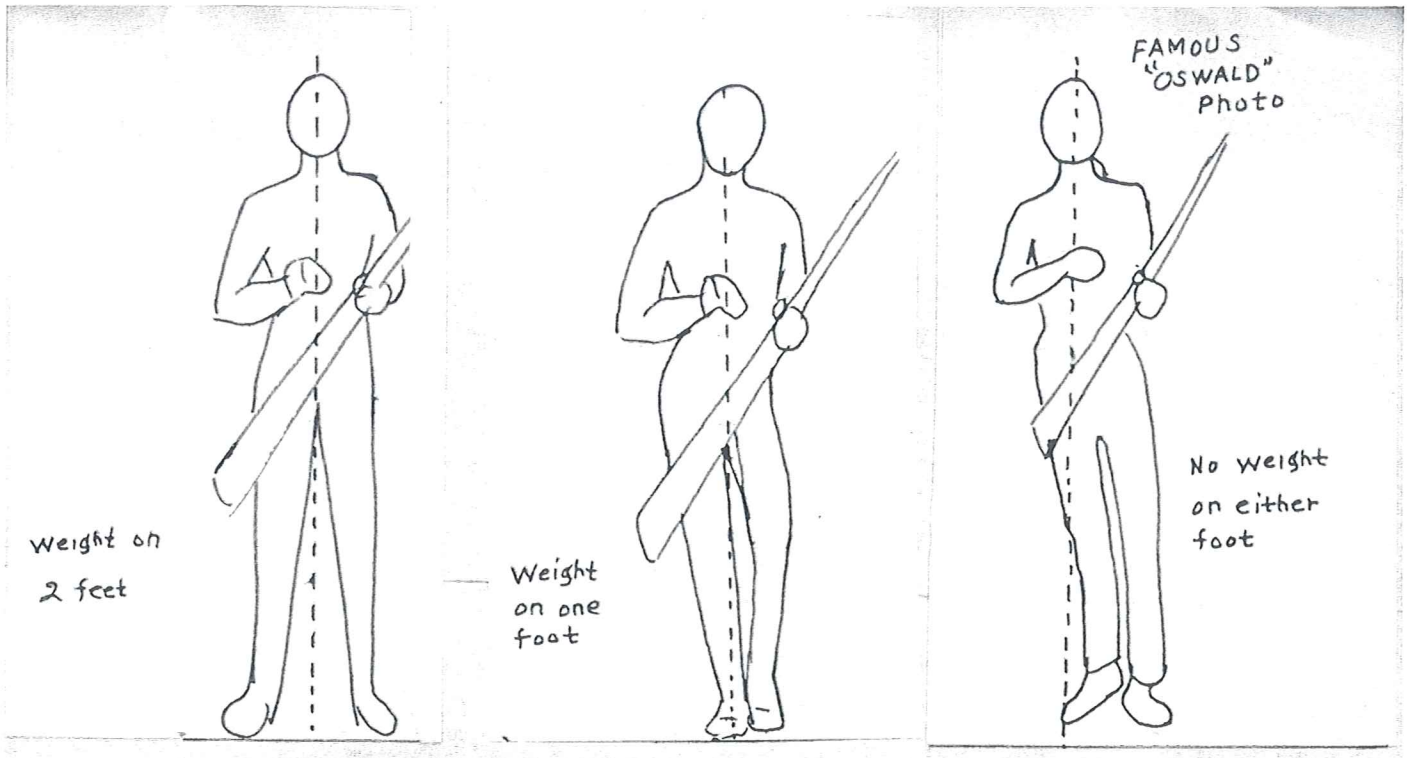
Dear Mr Weisberg,

I enclose check for $11.50 for which please send me the books I have checked on the order blank. We already have your first book as well as those of the others who have studied the Kennedy assassination.

In conjecturing about the famous photo of "Oswald", holding guns and communist publications, something important has been overlooked so far as I know - something that proves that the picture is a fake, put together from Oswald's head, an unknown's body with the guns and literature, against the same background as the photo from the "one" found negative. I think the sketches I enclose explain themselves.

When a person stands with the weight equally on both feet a plumb line would fall from the center of the neck column ~~this~~ to a point equidistant from each foot

If the weight is shifted to one foot the plumb line would fall from the middle of the neck



through the instep of the weight-bearing foot. In the "Oswald" picture both feet are on one side of the center of gravity. No one ever stood like that to be photographed! It was pasted together — for what sinister motives, who knows? But one is reminded of the burning of the Reichstag and the Kirov case in Stalin's Russia.

You can draw the vertical through the Oswald picture by drawing it parallel to the verticals in the buildings in the background.

I think others of the Zapruder frames have been perjured besides the one you mentioned in your first book.
